		Project Feature Number			
		Feature Type Code			
Required	1. Was vegetation removed or treated as approved?				
	a. Area treated: (ft <sup>2</sup> )				
	b. Length of bank treated, if applicable: (ft)				
	2. Was vegetation removed or treated in the approved location?				
	a. Location of treatment: BFC, FLD, LBK, RBK, UPL, OTH				
	3. Was vegetation removed from within the bankfull channel as approved?				
	a. Length of channel treated: (ft)				
	b. Length of aquatic habitat disturbed at the feature: (ft)				
	Vegetation	4. Were native species removed as approved?			
a. Native species removed or treated: (enter species codes)					
5. Were non-native invasive species removed as approved?					
a. Invasive species removed or treated: (enter species codes)					
6. Is total eradication of invasive species expected from this treatment?					
a. If not, are return removal visits agreed upon?					
a. Number of years feature will be monitored and maintained: (yrs)					
7. Was sufficient vegetation removed to "release" targeted vegetation?					
Methods	8. Did the treatment occur using the specified methods?				
	a. Methods: BRN, CGR, CSP, HAN, MAC, OTH				
	9. Were cuttings or slash removed or disposed of as approved?				
	10. Were erosion control methods used as approved?				
Implementation	a. Method: FAB, NTM, PLN*, ROC, SEE, SLF, STM, OTH				
	11. Does the feature meet design, contract & permit specifications?				
	a. If not, were modifications beneficial to performance?				
	b. Is non-compliance significant enough to jeopardize performance?				
	c. Are corrections needed?				
	12. Would a different treatment or design have been preferable? If Y, comment.				
	13. Feature Implementation Rating (Excl, Good, Fair, Poor, Fail)
