California:						

# Days Above the Standard:	0	0	0
Expected Peak Day Concentration:	1.99		
Year Coverage:	45	*	*

### Notes:

Eight-hour carbon monoxide averages and related statistics are available at Los Angeles-Westchester Parkway between 2004 and 2012. Some years in this range may not be represented.

All averages expressed in parts per million.

An exceedance of a standard is not necessarily related to a violation of the standard.

Year Coverage indicates the extent to which available monitoring data represent the time of the year when concentrations are expected to be highest. 0 means that data represent none of the high period; 100 means that data represent the entire high period. A high Year Coverage does not mean that there was sufficient data for annual statistics to be considered valid.

\* means there was insufficient data available to determine the value.

### Available Pollutants:
