# Days Above the Standard:	0		1		3	
Nat'l Standard Design Value:	*		*		0.064	
National Year Coverage:	94		85		94	

**California:**

# Days Above the Standard:	1	1	6
California Designation Value:	0.075	0.082	0.072
Expected Peak Day Concentration:	*	*	0.072
California Year Coverage:	88	78	93

**Notes:**

Eight-hour ozone averages and related statistics are available at Los Angeles-Westchester Parkway between 2004 and 2014. Some years in this range may not be represented.

All averages expressed in parts per million.

An exceedance of a standard is not necessarily related to a violation of the standard.

Year Coverage indicates the extent to which available monitoring data represent the time of the year when concentrations are expected to be highest. 0 means that data represent none of the high period; 100 means that data represent the entire high period. A high Year Coverage does not mean that there was sufficient data for annual statistics to be considered valid.

\* means there was insufficient data available to determine the value.

**Available Pollutants:**

8-Hour Ozone | [Hourly Ozone](#) | PM2.5 | [PM10](#) | [Carbon Monoxide](#) | [Nitrogen Dioxide](#) | [State Sulfur Dioxide](#) | [Hydrogen Sulfide](#)
