Households with individuals under 18 years	4 499	26.8
Households with individuals 65 years and over	4 390	26.0
	1,000	20.2
Average household size	2.30	(X)
Average family size [7]	3.01	(X)
HOUSING OCCUPANCY		
Total housing units	17,491	100.0
Occupied housing units	16,779	95.9
Vacant housing units	712	4.1
For rent	333	1.9
Rented, not occupied	31	0.2
For sale only	65	0.4
Sold, not occupied	23	0.1
For seasonal, recreational, or occasional use	62	0.4
All other vacants	198	1.1
Homeowner vacancy rate (percent) [8]	0.7	(X)
Rental vacancy rate (percent) [9]	4.1	(X)
HOUSING TENURE		
Occupied housing units	16 779	100.0
Owner-occupied housing units	Q 111	54.3
Population in owner-occupied housing units	21 5/0	(X)
Average household size of owner-occupied units	21,049	(X)
Denter econolisis hereing with	2.01	(//)
Renter-occupied nousing units	7,668	45.7
Population in renter-occupied nousing units	17,023	(X)
Average nousenoia size of renter-occupied units	2.22	( X )

X Not applicable.

[1] Other Asian alone, or two or more Asian categories.

[2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.

[3] One of the four most commonly reported multiple-race combinations nationwide in Census 2000.

[4] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race.

[5] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South American countries. It also includes general origin responses such as "Latino" or "Hispanic."

[6] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were

edited during processing to "unmarried partner."

[7] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[8] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100.

[9] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

### 2008-2012 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Culver City city, California			
	Estimate	Margin of Error	Percent	Percent Margin of Error
PERCENTAGE OF FAMILIES AND PEOPLE WHOSE INCOME IN THE PAST 12 MONTHS IS BELOW THE POVERTY LEVEL				
All families	(X)	(X)	4.6%	+/-1.6
With related children under 18 years	(X)	(X)	7.2%	+/-3.1
With related children under 5 years only	(X)	(X)	1.4%	+/-2.2
Married couple families	(X)	(X)	2.5%	+/-1.1
With related children under 18 years	(X)	(X)	3.3%	+/-1.8
With related children under 5 years only	(X)	(X)	0.0%	+/-5.1
Families with female householder, no husband present	(X)	(X)	12.8%	+/-7.2
With related children under 18 years	(X)	(X)	18.8%	+/-11.1
With related children under 5 years only	(X)	(X)	9.4%	+/-16.0
All people	(X)	(X)	7.1%	+/-1.3
Under 18 years	(X)	(X)	8.0%	+/-3.7
Related children under 18 years	(X)	(X)	8.0%	+/-3.7
Related children under 5 years	(X)	(X)	5.0%	+/-3.8
Related children 5 to 17 years	(X)	(X)	9.1%	+/-4.7
18 years and over	(X)	(X)	6.9%	+/-1.0
18 to 64 years	(X)	(X)	7.1%	+/-1.2
65 years and over	(X)	(X)	6.2%	+/-2.5
People in families	(X)	(X)	4.4%	+/-1.6
Unrelated individuals 15 years and over	(X)	(X)	14.9%	+/-2.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

While the 2008-2012 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.

3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of

sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
