Public Involvement in the MLPA Initiative

This Initiative was founded on solid public leadership, and seeks the advice of public policy advisors, scientists, stakeholders, and the interested public through a fair and inclusive process. The success of the first phase of the MLPA Initiative was, to a large extent, brought about by the active participation of stakeholders and the general public through the regional stakeholder group, workshops, public meetings, and providing input on documents and MPA plans as they developed. The second phase of the MLPA Initiative will again afford many opportunities for public involvement (see below).

Opportunities for Public Involvement*

- Attend public meetings, or watch them (live or archived) on the Internet
- Add yourself to the mailing list
- Comment on draft public documents
- Send comments (e-mail or written)

^{*} Links to these opportunities can be found at www.dfg.ca.gov/mlpa

Marine Life Protection Act (MLPA) - Goals

California Fish and Game Code Section 2853

- (a) The Legislature finds and declares that there is a need to reexamine and redesign California's MPA system to increase its coherence and its effectiveness at protecting the state's marine life, habitat and ecosystems.
- (b) To improve the design and management of that system, the Commission, pursuant to Section 2859, shall adopt a Marine Life Protection Program which shall have all of the following goals:
 - 1. To protect the natural diversity and abundance of marine life, and the structure, function and integrity of marine ecosystems.
 - 2. To help sustain, conserve and protect marine life populations, including those of economic value, and rebuild those that are depleted.
 - 3. To improve recreational, educational, and study opportunities provided by marine ecosystems that are subject to minimal human disturbance, and to manage these uses in a manner consistent with protecting biodiversity.
 - 4. To protect marine natural heritage, including protection of representative and unique marine life habitats in California waters for their intrinsic value.
 - 5. To ensure that California's MPAs have clearly defined objectives, effective management measures and adequate enforcement and are based on sound scientific guidelines.
 - 6. To ensure that the state's MPAs are designed and managed, to the extent possible, as a network.

MLPA Commonly Used Terms & Definitions

Marine Protected Area (MPA)

Named, discrete geographic marine or estuarine area seaward of the mean high tide line or the mouth of a coastal river, including any area of intertidal or subtidal terrain, together with its overlying water and associated flora and fauna that has been designated by law or administrative action to protect or conserve marine life and habitat.

State Marine Reserve (SMR)

The most restrictive classification, these are no-take areas (i.e. extractive activities are prohibited).

State Marine Park (SMP)

May allow recreational take, or limit it in some way, but does NOT allow commercial take.

State Marine Conservation Area (SMCA)

May limit recreational and/or commercial take to protect a specific resource or habitat.

State Marine Recreational Management Area (SMRMA)

A non-terrestrial marine or estuarine area designated so the managing agency may provide, limit, or restrict recreational opportunities to meet other than purely local needs while preserving basic resource values for present and future generations.

Note: Only one State Marine Recreational Management Areas was adopted in the central coast region.

Frequently Asked Questions

How much area was set aside off the central coast as MPAs and how much of that area will be closed to fishing?

The adopted regulations include 29 MPAs with varying degrees of protection; these MPAs cover

approximately 204 square miles, or about 18%, of state waters within the central coast study region (Pigeon Point to Point Conception). Of the total 29 MPAs, 13 are no-take state marine reserves which represent about 85 of the 204 square miles, or about 7.5% of the study region.

Type of MPA	Area of MPAs on Central Coast (mi ²)	Percent of Central Coast Waters
SMR	85.34	7.42%
SMP*	6.35	0.55%
SMCA	112.19	9.76%
Total	203.88	17.73%

How will the MLPA be implemented across the state?

Implementation has been split into five (5) distinct study regions that when completed will have assessed all state waters. The study regions are:

- North Coast: Oregon/CA border
 to Point Arena/Alder Creek
- North-Central Coast: Alder Creek/
 Point Arena to Pigeon Point
 (assessment started summer 2007)

- San Francisco Bay
- Central Coast: Pigeon Point to Point Conception (Implemented 9/21/07)
- South Coast: Point Conception to CA/Mexico border

Can I travel through or anchor in an MPA with catch onboard?

Yes, transit and anchoring are allowed. The language is found in Section 632 (a)(7) and (8), Title 14, California Code of Regulations:

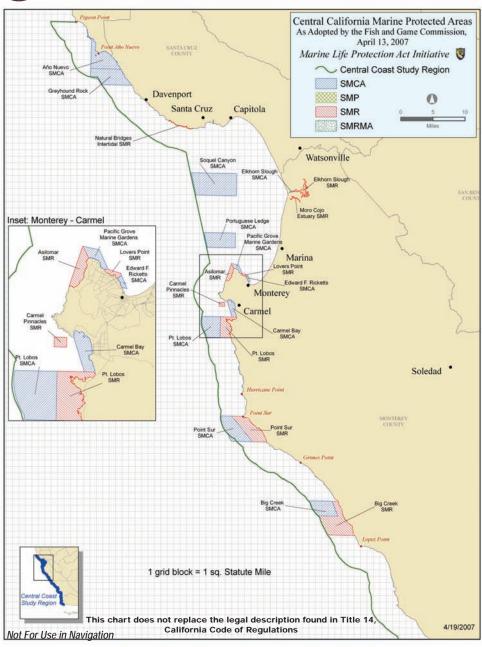

- (7) **Anchoring**. Vessels shall be allowed to anchor in any marine protected area or marine managed area with catch onboard unless otherwise specified in sub-section 632(b), areas and special regulations for use. Fishing gear shall not be deployed in the water while anchored in a state marine reserve. Fishing gear, except legal fishing gear used to take species identified as allowed for take in sub-section 632(b), shall not be deployed in the water while anchored in a state marine recreational management area, state marine park or state marine conservation area. Anchoring regulations shall be consistent with federal law and allowances made for anchoring required by emergency or severe weather.
- (8) **Transit or Drifting**. Vessels shall be allowed to transit through marine protected areas and marine managed areas with catch onboard. Fishing gear shall not be deployed in the water while transiting through a state marine reserve. Fishing gear, except legal fishing gear used to take species identified as allowed for take in sub-section 632(b), shall not be deployed in the water while transiting through a state marine recreational management area, state marine park or state marine conservation area.

*A Note about Elkhorn Slough and Cambria SMCAs...

In order to designate a State Marine Park, California State Parks requires another regulatory process in addition to that of the Fish and Game Commission. Elkhorn Slough SMCA and Cambria SMCA were both designed as SMPs but were adopted as SMCAs, and will be converted to SMPs in a separate action.
