

1-155-A Site Summary - Del Norte Coast Redwoods State Park**1-155-A****County:** Del Norte **ACP Division/Segment:** DN - E - S02**NOAA Chart:** 18603**Map Book:** CA Road Atlas**Decimal Degrees:** 41.66654 -124.14289**Site Description:**

The rugged shoreline and offshore rocks within a quarter mile of shore are managed by Redwood National and State Parks as part of Del Norte Coast Redwoods State Park and Redwood National Park. Offshore rocks, rocky headlands from Enderts Beach to Damnation Creek.

Seabird rookeries (04-09): Brandt's and pelagic cormorants, western gulls, common murre, pigeon guillemots (adults present 01-12). Double crested cormorant (01-12) - Breeding/nesting (03-09). Marbled murrelets (FT,SE)(01-12) feed in open waters. Black oystercatchers prevalent around mouth of Damnation Creek (01-12). Bald eagles (SE), peregrine falcons. River otters are found north and south of Midway Point (01-12); harbor seals, Steller sea lions: seal haulout on beach north of Midway Point (01-12); groundfish (EFH). Although usually not in large numbers, salmonids including coho (FT,ST) and chinook (SSC) salmon, steelhead (SSC), and coastal cutthroat trout (SSC) often forage in the nearshore environment and can be impacted by oiling. Rocky-intertidal MARINE monitoring sites at Enderts Beach and Damnation Creek.

Resources at Risk:*ESI and Habitat:* 1A Exposed Rocky Shore

2A Exposed wave-cut platforms in bedrock, mud, or clay

6A Gravel Beach

List of Resources at Risk:

	Resource Name	Status	Presence	Sensitivity
Birds	marbled murrelet	FT, SE	Year-round	
Birds	peregrine falcon	FP, SP	Year-round	
Birds	bald eagle	FP, SE	Year-round	
Birds	bird rookeries		Year-round	Mar-Sep
Fish	salmonids		Year-round	
Mammals	Steller sea lion	FP	Year-round	
Mammals	harbor seal	FP	Year-round	
Mammals	North American river otter	SSC	Year-round	

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

C – Cultural, Historic, Archaeological; E – Entry/Owner/Access; O – Other; S – Safety; T – Trustee; X – Exclusion or Security

Additional Site Summary Comments:

Breeding seabirds will use these rocks for nesting in the spring. Offshore rocks provide roosting and nesting habitat for birds and haulout locations for marine mammals. Care should be taken so that response activities do not flush wildlife from these areas. The rocks are sensitive to human intrusion year round, especially during nesting season (03-09) when the adults are on eggs and until the young have fledged from the nest. The offshore rocks have cultural significance for local tribes.

For further information about coastal access in this area, please refer to the California Coastal Commission's California Coastal Access Guide. For photos of the coastline in this area, please refer to the California Coastal Records Project (www.californiacoastline.org).

Cultural, Historical, and Archeological sites are known to exist in the area, however, the exact locations of these sites must be ascertained by contacting the Native American Heritage Commission at (916) 373-3710, the State Office of Historical Preservation (916) 445-7000, and/or the Northwest Information Center (707) 588-8455.

Concerns and Advice to Responders:

The rugged coastline will prevent onshore response over most of this area. Off-site measures including dispersants should be considered when a spill threatens to impact this area. Overflights should be careful to maintain flight path and altitude clearance distances that are large enough to prevent the flushing of birds and marine mammals from their nests, roosts, and haulouts on the offshore rocks in this area.

Hazard and Restrictions:

Extreme currents, offshore rocks, high energy shoreline, short steep beaches in some areas.

Site Strategies:**Site Validation Level: II**

Strategy: 1-155.1 Objective: No Onsite Options: Consider Offshore Containment/Recovery/ART

Strategy: This site is best protected by preventing the oil from arriving here, when possible. Off-site response options including dispersants should be considered.

Table of Response Resources

Last Page Update**Logistics:**

Directions: Take Hwy 101 for 4-miles south of Crescent City. Exit onto Enderts Beach Road at MP 23.85. Continue to parking lot at end of road. Access to beach area via foot trails. Foot access also to Damnation Creek Beach via foot trail from Hwy 101 MP 16.00.

Land Access: Foot access only

On-Water Limitations:

Facilities, Staging Areas, Command Posts, Available Equipment: none

Communications Problems: Remote, limited communications

Additional Operational Comments: Most of this area is difficult to access
