SITE DESCRIPTION:

This site is within MacKerricher State Park managed by State Parks. This site is bounded roughly between the mouths of the two creeks that flow across the wide sandy beaches that are backed by vegetated dunes. Inglenook Creek and Sandhill Lake Creek are seasonal creeks that flow across the beach. The presence of woody debris well back into the streams where they cross the dunes indicates considerable tidal and winter storm influence.

SEASONAL and SPECIAL RESOURCE CONCERN

These seasonal creeks may provide salmonid habitat during high flow regimes. Oil spill response at the mouths of these creeks is not likely to occur under these high flow conditions.

RESOURCES OF PRIMARY CONCERN

Marsh habitat within stream mouths. Dune vegetation.

Snowy plover (FT)(01-12), FWS Critical Habitat, nesting period (03-08). Nests directly on sand within dunes.

Globose dune beetle (01-12) found within area of two creeks

Menzies wallflower (SE, FE), Leafy reed grass (CNPS List 4.2, CA Rare); both found within area of two creeks

CULTURAL, HISTORIC, and ARCHEOLOGICAL SENSITIVITIES

Cultural, Historical, and Archeological sites are known to exist in the area, however, the exact locations of these sites must be ascertained by contacting the Native American Heritage Commission at (916) 653-4082 and State Office of Historical Preservation (916) 445-7000, and/or Ms. Leigh Jordan, Coordinator of the Northwest Information Center (707) 588-8455.

KEY CONTACTS: Trustee (T); Entry/Owner/Access (E); Cultural (C); or Other Assistance (O)

Type	Name / Title	Organization	Phone
O		NORCOM State Parks Dispatch 24-hours	(916) 358-1300

CONCERNS and ADVICE to RESPONDERS:

Clean up at this site would probably be a part of a larger effort to clean the entire beach from Pudding Creek to 10 Mile River. Getting access and controlling public use on this popular recreational bike and jogging path will require coordination with the local agencies and State Parks.

HAZARDS and RESTRICTIONS:

The site is remote and can only be accessed from the old log haul road that runs from 10 mile beach to Pudding Creek at the north end of Fort Bragg. Access is hampered to vehicles as the road is closed to vehicle traffic and is protected by locked gates.

SITE STRATEGIES

The beach is designated by FWS as Snowy plover Critical Habitat. Contact State Parks prior to initiating any response here. These shorebirds lay eggs in small cryptic nests at the upper tidal edge. Responders must keep their activity on paths below this area when working on the beach. Designate access paths to and from the beach to minimize potential impacts from response traffic when working in this area.

Strategy 1-432.1 Objective: General response clean up after the beach has been oiled.

When personnel are sent to this site, they should be prepared to create access corridors from the haul road across any dunes to the wet sand zone on the beach. Workers should generally stay away from the upper inter tidal sandy beach habitat where Snowy plovers may be nesting. Peak nesting period occurs from April to August.

Table of Response Resources

strategy number	harbor boom	swamp boom	Other boom type	sorb boom	Anchoring no type and gear	Boom boat	Skiffs punts	Skimmers No Type	Special Equipment or comment No and kinds	staff deploy	Staff tend

LOGISTICS

DIRECTIONS: to site (by land and/or by water, to nearest launch ramp and are access permits required.)

Take U.S. hwy 101 to Willits. Turn west on state hwy 20 and continue to state hwy 1 at Fort Bragg. Turn north on state hwy 1 and go north about 10 miles to Ten Mile River. Same access as for Ten Mile River (1-430-A) into the general area of the two creeks. Inglenook Creek is about 2 miles south of the mouth of Ten Mile River and is accessible from the abandoned Georgia Pacific haul road. The access gate is locked, but keys can be obtained at McKerricher State Park. Sandhill Lake Creek is south of Inglenook Creek by about .4 mile. This site is within MacKerricher State Park managed by State Parks.

LAND ACCESS: Access from haul road behind locked gates.

WATER LOGISTICS: Water access is probably not an option at this site.
Limitations: depth, obstruction
Launching, Loading, Docking
and Services Available:

FACILITIES, STAGING AREAS, POSSIBLE FIELD POSTS AND EQUIPMENT AVAILABLE:

The nearest large staging area is in Fort Bragg Harbor.
