## CONCERNS and ADVICE to RESPONDERS:

Last Page Update :

The rugged coastline will prevent on shore response over most of this area. Off site measures including dispersants should be considered when a spill threatens to impact this area. Overflights should be careful to maintain flight path and altitude clearance distances that are large enough to prevent the flushing of birds and marine mammals from their nests, roosts, and haul outs sanctuaries on the offshore rocks in this area.

## HAZARDS and RESTRICTIONS:

Extreme currents, high energy shoreline, offshore rocks

## SITE STRATEGIES

This site is best protected by preventing the oil from arriving here, when possible. Off site response options including dispersants should be considered.

Strategy 1-476.1 Objective: Prevent oiling of off shore rocks and rocky shoreline by dispersing the oil off-site.

Apply dispersants to off-site oil before it arrives at this sensitive site.

## Table of Response Resources

strategy number	harbor boom	swamp boom	Other boom type	sorb boom	Anchoring no tvpe and gear	Boom boat	Skiffs punts	Skimmers No Type	Special Equipment or comment No and kinds	staff deploy	Staff tend
