**Additional Site Summary Comments:**

**Concerns and Advice to Responders:**

Oil on and around these rocks and islands will expose seabirds to oil, excessive surf conditions may splash oil onto roost or nest areas. Oil will also be detrimental to the intertidal and shallow subtidal organisms that occur in the area.

**Hazard and Restrictions:**

Heavy surf, submerged rocks and wash rock.

**Site Strategies:****Site Validation Level: 0**

**Strategy: 2-161.1 Objective:** Prevent oil from stranding and contaminating bird use areas on the rocky islands.

**Strategy:** Because of high wave energy and rocky conditions at this site, mechanical shoreline protection techniques may not be possible. On-water containment and recovery efforts are the best available protection strategy.

a) Pursue feasibility of alternative response technologies (e.g. dispersants, in-situ burning).

Table of Response Resources

**Last Page Update****Logistics:**

**Directions:** Accessible only by water. This site is a collection of near-shore wash rocks and islands north and south of Estero San Antonio in Marin County.

**Land Access:** boat only

**On-Water Limitations:** submerged rocks and heavy surf. Nearest launch in Bodega Bay or Tomales Bay.

**Facilities, Staging Areas, Command Posts, Available Equipment:** Closest facilities in Bodega or Tomales Bays.

**Communications Problems:**
