Additional Site Summary Comments:**Concerns and Advice to Responders:**

The concern is two-fold: first, that oil will be transported though this site to other parts of the delta; and second, that marsh islands and margins will be oiled. These marshy areas are sensitive and habitat to many sensitive species. There is always the concern of impacts from response and cleanup: trampling vegetation, disturbing wildlife, and tracking oil into marshes and sediments.

Hazard and Restrictions:

Boat traffic beware of shallows, many snags and mud bars. Poison Oak.

Site Strategies:**Site Validation Level: 0****Strategy: 2-896.1 Objective:**

Strategy: no technique developed.
