SITE DESCRIPTION:

See Division H map.

SEASONAL and SPECIAL RESOURCE CONCERN

Restricted shoreline access through PG&E Diablo Canyon Nuclear Power Plant. Site is within Point Buchon State Marine Conservation Area and Marine Reserve MPA, fisheries management areas that extend 3 miles offshore, and is governed by special protections established by the CDFW Marine Region. Species of concern are present year round. Harbor Seal pupping season is March- June, Southern sea otters peak pupping season Jan-March. Leatherback sea turtles designated Critical Habitat extends from shore out to 100 miles offshore; most commonly observed Aug - Nov.

RESOURCES OF PRIMARY CONCERN

This is a haulout area for large numbers of harbor seals. 1,000 animals have been observed here. Sea otters can be observed offshore.

CONCERNS and ADVICE to RESPONDERS:

Last Page Update : 5/1/2014

Site is within Point Buchon State Marine Conservation Area and Marine Reserve MPA, fisheries management areas that extend 3 miles offshore.

Throughout Division H, black abalone (endangered) may be present in rocky intertidal habitat (designated critical habitat). Leatherback sea turtles designated critical habitat extends from shore out to 100 miles offshore; most commonly observed Aug - Nov.

Off-shore rocks part of the Coastal National Monument under BLM jurisdiction.

HAZARDS and RESTRICTIONS:

Restricted shoreline access through PG&E Diablo Canyon Nuclear Power Plant. 24 hour # (805) 545-3377.

SITE STRATEGIES

Strategy 4-325.1 Objective: Defect or exclude oil from this rocky intertidal habitat.

Offshore containment and recovery (OCR) is the preferred option although heavy surf may hinder these operations. No specific response equipment listed due to the many variables associated with each spill regarding OCR. Early consideration should be given to the use of applied response technologies.
