**Decimal Degrees:** 34.5842 -120.6453

Special Permission required for access through Vandenberg Space Force Base (see Land Access for more info). This site extends from the Point Pedernales area to the "boat house", approximately 2 miles SSE of Rocky Point. The area is a combination of exposed rocky cliffs, wave-cut platforms, fine to medium-grained sand beaches, mixed sand and gravel beaches, many of these being pocket beaches. This is a high energy, west facing coastal segment, with numerous offshore wash rocks. Vandenberg State Marine Reserve is included in this site. This site is associated with the following BLM California Coastal National Monument site: Destroyer Rock. This rock is west of Point Pedernales. It potentially has ashy storm-petrel nesting. Harbor seal pupping and breeding (Dec-May) occurs at this site. Seabird nesting occurs during the spring and summer. All year for a small group of sea otters in the Point Pedernales area. Rich rocky intertidal biota offshore including red sea urchins, spiny lobster and rockfish.

*ESI and Habitat:* 5 Mixed sand and gravel beaches

### 3B Scarps and steep slopes in sand

2A Exposed wave-cut platforms in bedrock, mud, or clay

## 1A Exposed Rocky Shore

**Additional Site Summary Comments:**

**Concerns and Advice to Responders:**

Inshore waters and shorelines contain sensitive habitat for invertebrates, birds, sea otters, and other marine mammals which can be injured or killed by oil. Because there are no practicable onshore response strategies for protecting these resources and the shorelines are virtually inaccessible except by foot traffic, landing craft or helicopter, it is best to collect and/or disperse oil offshore, before it reaches inshore areas or the shoreline.

**Hazard and Restrictions:**

Special Permission required for access through Vandenberg Space Force Base (see Land Access for more info). Unhealthy levels of coliform bacteria have been found intermittently in streams and on beaches in this area. Use appropriate PPE, safety procedures, and include reference to potential health problems in any site safety plan.

**Site Strategies:****Site Validation Level: II**

**Strategy: 4-560.1 Objective:** Shoreline Pre-Clean: Resource Specialist Supervision Required

**Strategy:** Consult with resource trustees regarding wildlife issues before undertaking this activity. Hand crews to move and store kelp, driftwood, vegetative debris, trash, and other materials above high-tide line. Dispose of trash. Replace unoiled debris in its former location once the threat of oiling is past.

Table of Response Resources

| Equipment | Sub-Type   | Size | Unit | QTY | Unit | Last Page Update |
|-----------|------------|------|------|-----|------|------------------|
| Vehicle   | ATV        |      |      | 1   |      |                  |
| Misc.     | Trash Bags |      |      |     |      |                  |
| Staff     |            |      |      | 5   |      |                  |

**Logistics:**

**Directions:** Access to the shoreline is available at the south end of site ("boat house"), but is very limited elsewhere.

**Land Access:** This site is located on Vandenberg Space Force Base. Access to beaches and land sites must be authorized through the Space Force Base. For access authorization to the air base roadways, lands, and shorelines, responders must call the Law Enforcement Desk at 805-606-3911 and the Vandenberg Conservation Office at 805-606-6804. An escort may be required in some locations.

**On-Water Limitations:** Avila Harbor is the nearest full service civilian harbor. Facilities for small vessel loading occur at the "Boat House" in the vicinity of Rocky Point just south of Point Arguello. These facilities could be utilized with permission from VSFB. Area is rocky.

**Facilities, Staging Areas, Command Posts, Available Equipment:** An old Coast Guard building located on bluffs above the boat dock may service as a field command post.

**Communications Problems:** Cell phone communications are limited.

**Additional Operational Comments:** The California Department of Fish and Wildlife and VSFB must be consulted before the staging of motorized equipment and heavy traffic are permitted.
