

4-855-A Site Summary - Santa Cruz Island: Forney Cove**4-855-A****County:** Santa Barbara **ACP Division/Segment:** CI - C - S000**NOAA Chart:** 18720**Map Book:** NA**Decimal Degrees:** 34.048333 -119.888333**Site Description:**

This site extends from Forney Cove to Black Point on The Nature Conservancy Property. This area includes vertical rock cliffs, wave-cut platforms and sand or gravel beaches. Some of the offshore areas of this site are included in the Painted Cave State Marine Conservation Area. Harbor seals pup and bred from Dec-May. Birds nest from Mar-Nov including California brown pelican, pigeon guillemot, ashly storm petrel, Cassin's auklet, black oystercatcher, Brandt's and pelagic cormorant. Shorebirds are present. Rocky intertidal resources are present offshore including black abalone.

Resources at Risk:**ESI and Habitat:** 5 Mixed sand and gravel beaches

2A Exposed wave-cut platforms in bedrock, mud, or clay

1A Exposed Rocky Shore

List of Resources at Risk:

| | Resource Name | Status | Presence | Sensitivity |
|---------------|--------------------------------|---------|------------|-------------|
| Birds | Western snowy plover | FT, SSC | Year-round | |
| Birds | seabirds | | Year-round | |
| Birds | shorebirds | | Year-round | |
| Invertebrates | black abalone | FE | Year-round | |
| Invertebrates | rocky intertidal invertebrates | | Year-round | |
| Mammals | marine mammals | FP | Year-round | |

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

C – Cultural, Historic, Archaeological; E – Entry/Owner/Access; O – Other; S – Safety; T – Trustee; X – Exclusion or Security

Additional Site Summary Comments:

The Nature Conservancy owns approximately 75% of Santa Cruz Island as a preservation area. The other 25% is owned by the National Park Service.

Western snowy plovers nest from Mar-Sep.

Concerns and Advice to Responders:

Santa Cruz Island is located 20 miles from the mainland and is home to large numbers of seals and sea lions as well as colonies of seabirds. At over 96 square miles, Santa Cruz Island is California's largest island and has 77 miles of craggy coastline cliffs, giant sea caves, pristine tidepools, and expansive beaches. Trustee agencies may not sanction onshore response activities. Refer to and comply with introductory section before initiating any response activities.

Hazard and Restrictions:

Conditions in the Santa Barbara Channel and around the islands are variable and the ocean is unforgiving. Only experienced skippers with vessels capable of withstanding severe weather are advised to make the cross-channel passage. Major shipping lanes lie between the islands and the mainland.

Site Strategies:**Site Validation Level: II**

Strategy: 4-855.1 Objective: Shoreline Pre-Clean: Resource Specialist Supervision Required

Strategy: Refer to Channel Islands Introduction Section (especially Biosecurity) before conducting any shoreline precleaning. A natural resource trustee and/or an archaeologist (usually a CINP employee) may need to be on-site during work to ensure compliance with Channel Island response restrictions. Small hand crews of no more than 10 persons remove and store kelp, driftwood, vegetative debris, trash, and other materials which could become oiled and create environmental hazards and disposal problems. Segregate and dispose trash. Replace unoiled debris in its former location once the threat of oiling is past.

Table of Response Resources

| Equipment | Sub-Type | Size | Unit | QTY | Unit | Last Page Update |
|-----------|----------|------|------|-----|------|------------------|
| Staff | | | | 5 | | |

Logistics:

Directions: Only by boat or aircraft. Closest harbors are Santa Barbara and Ventura. Channel Islands Aviation is located at Camarillo Airport and is able to fly and land on the islands. All access to the Channel Islands must be coordinated with National Parks and must follow biosecurity protocols. Refer to introductory section for more information.

Land Access:

On-Water Limitations: Vessel landing available at Prisoners Harbor (Northeast face of center of island) and Scorpion Harbor (Northeast end of island). Caution: monitor sea conditions and depth before attempting approach.

Facilities, Staging Areas, Command Posts, Available Equipment:

Communications Problems: Cell phone reception unreliable. Marine VHF or satellite phone best options.

Additional Operational Comments: Each island is equipped with at least 1 base station radio for communication with park headquarters and a marine band radio.
