Site history, stand age, comments: masticated Spring 2018 burn - controlled - Was mature chaparral now early seral post fire stand. Co dominated by Arceuthobium w/ other chaparral obligate seeders. Seedlings under 0.5m w/ sparse herb cover. Open habitat with some resprouting oaks & reduced emergent trees lightly burned, still living. Very few non natives. Upturned bruts as a result of mastication.
