

RECON FIELD FORM (April 23, 2017, with slope/aspect)

Recorder: <u>Lucy F.</u>		Other Surveyors: <u>ASH</u>		Date: <u>8/6/21</u> Return? ☐																																																																																	
Waypoint ID: <u>SCR2457</u>	Location Name: <u>Hansen Slough</u>																																																																																				
	GPS Name <u>Lucy's iPhone</u> Projected? ☒ Yes / No / Base / Digitized																																																																																				
	If Yes, enter: Bearing (°): <u>75</u> Distance (m): <u>10</u> Inclination (°): <u>5</u>																																																																																				
	If Yes or Digitized, enter: Base Waypoint ID: _____																																																																																				
Stand Size: <1 <u>1-5</u> >5		Camera: <u>Lucy's iPhone</u> Photos: _____																																																																																			
View Radius _____																																																																																					
Exposure, Actual °: <u>63</u> NE NW SE <u>(SW)</u> Flat Variable Steepness, Actual °: <u>13</u> 0° 1-5° <u>>5-25°</u> >25																																																																																					
Field Alliance name: <u>Baccharis pilularis</u>																																																																																					
Comments: Stand of BAPI extends to water's edge. Upland vegetation includes scattered coast live oak. Family of Raccoons makes home in nearby sparganium - Rubus stand. Bapi stand has edge of steep mud bank below rather than typical wetland edge veg. Nutria(?) seen nearby.
