

RECON FIELD FORM (April 23, 2017, with slope/aspect)

Recorder: <u>Lucy F</u>		Other Surveyors: _____		Date: <u>9/23/21</u>		Return? ☐																																																																																																						
Waypoint ID: <u>SCRU 2949</u>		Location Name: <u>SFPUC Marsh Rd</u>																																																																																																										
		GPS Name <u>Lucy's iPhone</u> Projected? Yes ☒ No ☐ Base / Digitized																																																																																																										
		If Yes, enter: Bearing (°): _____ Distance (m): _____ Inclination (°): _____																																																																																																										
		If Yes or Digitized, enter: Base Waypoint ID: _____																																																																																																										
		Base / Projected (circle one) Record either UTM's or Decimal Degrees GPS error: ft./ m./ PDOP <u>15'</u>																																																																																																										
		UTMs: UTME <u>37.443880°</u> UTMN <u>-121.766472°</u>																																																																																																										
Stand Size: <1 <u>(1-5)</u> >5		Camera: <u>Lucy's</u> Photos: _____																																																																																																										
View Radius <u>30m</u>																																																																																																												
Exposure, Actual °: <u>346</u> NE <u>(NW)</u> SE SW Flat Variable Steepness, Actual °: <u>32</u> 0° 1-5° >5-25° <u>>25</u>																																																																																																												
Field Alliance name: <u>Quercus kelloggii</u>																																																																																																												
Comments: <u>steep North facing slope is dominated by Black oak and poison oak with a mix of native & non native herbs. Understory looks to have burned within the last year, leaving young new growth on consumed shrubs - Trees unburned.</u>
