

4-806-A Site Summary - San Miguel Island: East Simonton Cove**4-806-A****County :** Santa Barbara **ACP Division/Segment :** CI - A - S000**NOAA Chart :** 18720**Map Book :** NA**Decimal Degrees** 34.055 -120.39**Site Description:**

Northwest central part of Island in between Otter Harbor to Harris point. East Simonton Cove area is primarily exposed wave-cut rock platforms. Nesting birds include Brandt's and pelagic cormorant, black oystercatcher, snowy plover, peregrine falcon and western gull. Marine mammals include harbor seals, northern elephant seals and California sea lions. Important intertidal resources include black abalone. The areas offshore of this site are included in the Harris Point State and Federal Marine Reserves. Richarson Rock State and Federal Marine Reserves are located farther to the northwest. Richarson Rock which is about 8.5 miles northwest and Wilson Rock which is about 3.5 miles north of Simonton Cove are associated with the BLM California Coastal National Monument.

Resources at Risk:*ESI and Habitat:* 2A Exposed wave-cut platforms in bedrock, mud, or clay**List of Resources at Risk:**

	Resource Name	Status	Presence
Birds	Western snowy plover	FT	Year-round
Birds	seabirds		Year-round
Invertebrates	black abalone	FE	Year-round
Invertebrates	rocky intertidal resources		Year-round
Mammals	San Miguel Island fox	FE, SE	Year-round
Mammals	marine mammals		Year-round

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected, SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

Additional Site Summary Comments:

Western snowy plovers nest from Mar-Sep. Seabirds nest from Mar-Nov and marine mammals pup and breed from Dec-Aug.

Concerns and Advice to Responders:

San Miguel Island is the northernmost and farthest west of the Channel Islands, lying 55 miles northwest of Ventura. More than 100,000 seals and sea lions breed, pup, and haul out on the island's 27 miles of isolated coastline. Large numbers of sea birds nest on San Miguel and on nearby Prince Island. Trustee agencies may not sanction onshore response activities. Refer to and comply with introductory section of 9814 before initiating any response activities.

Hazard and Restrictions:

Conditions in the Santa Barbara Channel and around the islands are variable and the ocean is unforgiving. Only experienced skippers with vessels capable of withstanding severe weather are advised to make the cross-channel passage. Major shipping lanes lie between the islands and the mainland.

Site Strategies:

Strategy: 4-806.1 Objective: No Onsite Options: Consider Offshore Containment/Recovery/ART

Strategy: Onshore protection strategies for this area are extremely limited. Attempt to collect and/or disperse oil in offshore locations before it reaches the shoreline. Before initiating any response activities within the Channel Islands National Marine Sanctuary or the Channel Islands National Park, refer to and comply with the Channel Islands Introductory section 9814. Protect the Marine Protected Area (MPA) boundaries.

Table of Response Resources

Last Page Update

Logistics:

Directions: Only by boat (access by boat generally not practical) or aircraft. Closest harbors are Santa Barbara and Ventura. Channel Islands Aviation is located at Camarillo Airport and is able to fly and land on the islands. All access to the Channel Islands must be coordinated with National Parks and must follow biosecurity protocols. Refer to introductory section of 9814 for more information.

Land Access: No road or vehicle access.

On-Water Limitations: High energy shoreline. Access by sea not practical.

Facilities, Staging Areas, Command Posts, Available Equipment: None.

Communications Problems: Cell phone reception is unreliable. Marine VHF or satellite phones are the best options.

Additional Operational Comments: Each island is equipped with at least 1 base station radio for communication with park headquarters and a marine band radio.

Imagery: NAIP 2010 (Summer) 4-Band
