**Additional Site Summary Comments:**

**Concerns and Advice to Responders:**

To protect endangered and sensitive species roosting habitat.

**Hazard and Restrictions:**

Watch weather and sea conditions.

**Site Strategies:**

**Site Validation Level: II**

**Strategy: 5-130.1 Objective:** No Onsite Options: Consider Offshore Containment/Recovery/ART

**Strategy:** This site is difficult to protect. Mechanical shoreline protection techniques are not likely to be effective because of high wave energy and rocky conditions at the site.

A) Recommended response strategy is on-water containment and recovery (e.g. towed boom arrays).

B) Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) to reduce the volume of oil reaching the site.
