Additional Site Summary Comments:

This is a popular recreation area which is adjacent to a Boy Scout camp, several marinas, and public beach.

Concerns and Advice to Responders:

To protect endangered and sensitive species and wetland habitat. Responders should watch for and avoid nesting birds and minimize disturbances to vegetation. Avoid the spread of oil into the wetland through response activities.

Hazard and Restrictions:

Fast tidal currents can impact the channel into the wetland. Use caution when placing the boom.

Site Strategies:

Strategy: 5-210.1 Objective: Exclusion of oil entry to wetland.

Strategy: Boom to prevent oil entry to inlet.

Strategy: 5-210.2 Objective: Exclusion of oil entry to wetland.

Strategy: Boom (1500') may be placed to move oil to a collection point. South end of boom is placed at the end of the rock jetty to the north of the launch ramp. North end of boom is placed at the riprap where the breakwater at Cabrillo Marina starts. The north end can be used as a collection point. Anchors will be needed when the wind is not from the S or SW or the currents are too strong to keep the boom configuration. Consider using up to 5 anchors in windy conditions.
