**Concerns and Advice to Responders:**

To protect endangered and sensitive species and wetland habitat. Responders should watch for and avoid nesting birds and minimize disturbances to vegetation. Avoid the spread of oil into the wetland from response activities.

**Hazard and Restrictions:**

Fast tidal currents can impact the channel into the wetland. Use caution when placing the boom.

**Site Strategies:**

**Strategy: 5-210.1 Objective:** Exclude Oil

*Strategy:* Boom to prevent oil entry to inlet.

**Strategy: 5-210.2 Objective:** Exclude Oil

*Strategy:* Boom (1500') may be placed to move oil to a collection point. South end of boom is placed at the end of the rock jetty to the north of the launch ramp. North end of boom is placed at the riprap where the breakwater at Cabrillo Marina starts. The north end can be used as a collection point. Anchors will be needed when the wind is not from the S or SW or the currents are too strong to keep the boom configuration. Consider using up to 5 anchors in windy conditions.
