Concerns and Advice to Responders:

To protect sensitive species haul-out habitat.

Hazard and Restrictions:

Watch weather and sea conditions.

Site Strategies:

Strategy: 5-380.1 Objective: No Onsite Options: Consider Offshore Containment/Recovery/ART
Strategy: This site is difficult to protect. Mechanical shoreline protection techniques are not likely to be effective because of high wave energy and rocky conditions at the site.

- a) Recommended response strategy is on-water containment and recovery (e.g. towed boom arrays).
- b) Pursue feasibility of alternative response technologies (e.g. dispersants and in-situ burning) to reduce the volume of oil reaching the site.
