

6-125-A Site Summary - Hidden Creek**6-125-A****County :** San Diego **ACP Division/Segment :** SD - B - S004 SD - B - S005**NOAA Chart :** 18774 **Map Book :** 409 L8 **Decimal Degrees** 33.2755 -117.4518**Site Description:**

Hidden Creek is a small seasonal creek that drains rainwater from the hills of Camp Pendleton. The creek is situated in a narrow, steep, high banked channel that meanders eastward about 200 yards from the coastal bluff face. During most of the year the creek mouth is closed naturally by a sand berm at the beach face. Only during fairly significant rainfall events does a sufficient amount of water flow to open the creek mouth. It is during the times when the mouth is open that the consideration of any protection strategy is necessary. Numerous species of birds, amphibians, invertebrates, and terrestrial mammals exist here.

Resources at Risk:*ESI and Habitat:* 3A Fine to medium-grained sand beaches**List of Resources at Risk:**

	Resource Name	Status	Presence
Birds	California least tern	FE, SE	Feb - Sep
Birds	Western snowy plover	FT	Year-round
Fish	tidewater goby	FE	Variable

FT-Federally Threatened, FE-Federally Endangered, FP-Federally Protected, SE-State Endangered, ST-State Threatened, SP -State Protected
 SR-State Rare, SSC-Species of Special Concern, BGEPA-Bald and Golden Eagle Protection Act, SSSP-State Special Status Species

Additional Site Summary Comments:

Response efforts at this site will require coordination with the Commanding Officer of Marine Corps Base Camp Pendleton. The base routinely conducts amphibious training and other maritime operations along the beachfront. Early coordination to avoid conflict between responders and military OPS is critical. Gate access and guided travel within Camp Pendleton work sites should be coordinated to help avoid extensive delays clearing the gate security office, and to speed up response time to the remote locations along this relatively undeveloped coastline.

Concerns and Advice to Responders:

Strategically Dynamic: Assess current site conditions before selecting a response strategy or ordering response equipment.

Hazard and Restrictions:**Site Strategies:**

Strategy: 6-125.1 Objective: Build a sand berm to prevent oil from entering the wetland.

Strategy: Close the creek mouth to tidal flow by constructing a sand berm using borrowed sand from the lower beach face. Minimize sand relocation from the upper beach face.

Table of Response Resources

Equipment	Sub-Type	Size	Unit	QTY	Unit	Last Page Update
Heavy Equipment	Backhoe			1		
Staff	Staff to Deploy			1		

Strategy: 6-125.2 Objective: Use sorbent boom to stop the spread of floating oil.

Strategy: Deploy sorbent boom across the creek mouth to intercept floating oil. Plan to deploy two parallel layers of sorbent material if oil is threatening the wetland.

Table of Response Resources

Equipment	Sub-Type	Size	Unit	QTY	Unit	Last Page Update
Boom	Sorbent Boom			100	feet	
Vessel	Skiff or Punt			1		
Staff	Staff to Deploy			3		

Strategy: 6-125.3 Objective: Erect a filter fence to prevent oil from entering the wetland.

Strategy: Construct a filter fence across the creek mouth to prevent petroleum from entering the wetland on high tide.

Table of Response Resources

Equipment	Sub-Type	Size	Unit	QTY	Unit	Last Page Update
Fence	Filter			100	feet	
Staff	Staff to Deploy			6		

Logistics:

Directions: Exit I-5 at Las Pulgas Road. At the base of the off-ramp turn left heading west toward the gated fence. Pass through the gate and immediately turn left (south) along the dirt road. Approximately one-half mile south turn right and head to the beach. At the beach turn south and travel approximately one-half mile to the Hidden Creek channel at the

Land Access: Response vehicles should approach the site using the wet sand edge along the beach face to minimize

On-Water Limitations: Not practical from the Pacific Ocean.
