Dear Phil:

I have discussed the proposed Rare Fish Sanctuary in the Fish Slough area with Department of Water and Power Management and I am pleased to report that the Department will cooperate in any way possible on this project. We feel the sanctuary would be a valuable addition to the valley's recreation attractions as well as an important conservation measure.

At your request we have prepared a preliminary drawing showing the facilities required as per your discussions with Department representatives.

The sanctuary would require about 21 acres of Department land. The earth fill dike will be seven feet high with a pond capacity of approximately 10 acre feet and therefore would be exempt from supervision by the Department of Water Resources.

We will prepare the necessary license agreement covering the 21 acre site as soon as you indicate that the Department of Fish and Game is ready to proceed.

Very truly yours,

ROBERT V. PHILLIPS

and Assistant Manager

Modification of License Agreement with LADWP Regarding Owens Valley Native Fish Sanctuary, Fish Slough, Mono County

On October 9, 1969, the Department entered with the Los Angeles Department of Water and Power into License Agreement No. LA-331, which covers the operation of a rare fish sanctuary on LADWP lands in Fish Slough, Mono County.

During the spring of 1980, we contracted with LADWP to construct a new impoundment immediately downstream from the original sanctuary. This second impoundment is proving to be very effective in preserving the native fishes of the Owens Valley.

Upon examining License Agreement No. LA-331, we found that it did not appear to cover the new impoundment and the map description in the agreement did not include the new pond. We requested that LADWP prepare an appropriate document to update the 1969 License Agreement. This has been accomplished.

Enclosed are two (2) copies of a Modification of License for License Agreement LA-331 covering the second impoundment at the Owens Valley Native Fish Sanctuary. We recommend the Director sign these documents.

Following signature by the Director, please send both copies to LADWP for final execution; Address: Los Angeles Department of Water and Power, Land Section Office, 873 North Main Street, Bishop, CA 93514. Upon approval by LADWP Management, a fully executed copy will be returned for Department files.
